

Infographic

IBSM INFOGRAPHIC LEARNING TASK

Instructions

I. Aim:

This assignment consists of two parts:

- A. To design and produce an A4-size infographic (visual representation) that captures the main steps and key elements of Inductive Bible Study Method (IBSM) that a student has learned thus far in the course – from Observation up to and including Application. (300 points)
- B. You will use your IBSM Infographic to teach or share with others (e.g. cell group members, fellowship or discipleship group) on the steps of personal Bible study in a 60-75 minute-session plus 30 minutes for questions.

Your infographic should be comprehensive (i.e., captures all the key elements) yet simple enough such that it is your teaching tool as well as a handout that can be given to your target audience. (200 points)

II. What is an infographic

An infographic is a visual representation using images, charts, and minimal text that gives an easy-to-understand overview of a topic. A good infographic gives a reader a good overview on the subject, at the same time shows the flow and connection between different parts of the subject. Also, a well-designed infographic enables people to understand and remember the content easily.

III. How to create an infographic

Step 1:

Imagine you have been asked to teach a one-hour training on “The Steps of Personal Bible Study” to a group of believers. Review your Course Notes on IBSM (Part I) and decide on the essential and relevant elements of IBSM that you need to include in this one-hour training.

Caution: Do not replicate every lesson or detail of the IBSM course because you are not conducting a IBSM course. Your objective is to identify essential and relevant information related to the Inductive Bible Study Method that people must know in order to do personal Bible study of a Bible text.

Step 2:

Design and create an infographic on an A4-size paper (can be portrait or landscape orientation) that captures all the key elements you wish to convey (as identified in Step 1). Student can use a software tool (e.g. MS-Publisher or equivalent; online application e.g. www.canva.com) or free-hand draw to produce the infographic.

- This infographic should be comprehensive yet simple to understand and easy to remember.
- Present your content in the form of a picture, object, diagram, chart, tables or a combination of them. Be creative!
- Make your infographic interesting and visually appealing (e.g., includes color, good design, images, charts, minimal text, etc.) Ensure it is not cluttered – empty white-space is also an important design feature. Texts must be easily readable.

Step 3:

Write a teaching-script for your infographic. The contents should cover as concisely as possible what you are going to say during the training. Estimating based on Times 12-font size 1.5 line-spacing, the teaching-script should be about 8 to 10 pages prose sentences. [NB: estimate is based on 6 or 7 minutes of speaking time per page; if your script exceeds this number of pages, it will likely mean you will exceed the 60-75 minutes teaching time.]

The script contents should explain the following:

- a. What are you trying to communicate with your infographic? How does your design help the person to remember and learn the elements of IBSM?
- b. What does each part of your infographic mean or represent?
- c. How do the parts fit together or relate to each other?
- d. What verses or passages will you use as examples to illustrate your teaching point?

IV. Assignment Grading Details and Due-dates

Grading Rubric: This assignment will be graded based on the following criteria:

Comprehensive: The infographic successfully captures all the key or essential elements of BSM that can be covered in a one-hour session. (40% - 120 points))

Simple & Easy to understand: The infographic is logical, simple, and easy to follow without requiring much text description. (15% - 45 points)

Visual Design: The infographic is creative, visually appealing (i.e., content is easy to grasp, good use of colors, charts, images, blank spaces, minimal texts, etc.), and memorable (i.e., easy to remember). (15% - 45 points)

Teaching Script:

1. The explanation in the script is well-written, concise, and accurately reflects what was taught in the IBSM course.
2. The explanation also includes good examples from the Bible related to what is being taught.
3. The written script conforms to the guidelines given. (30% - 90 points)

Teaching / Sharing Session

The student uses his/her Infographic to teach or share with a small group and submits a report by the due date as specified in the Syllabus Course Schedule. (200 points)

IN SUM: The infographic itself is worth 300 points and the presentation is worth 200 points.
